

I love my K-Love station and was so glad to find it here in Alaska! The format of the station is so uplifting and not having to have commercials is such a relief. All they do all day long is play positive and encouraging music and it has touched my life in so many ways. I actually look forward to driving because I know it will be on my car radio as soon as I turn it on. Please so ceverything in your power to keep such a wonderful resource availalbe to me and so many others. Taking it away would take away something so positive and lasting in my life and we need MORE stations like K-Love, not less or other things. There are so many options for other radio formats...this one is special and unique and a blessing amid the chaos and negative impact of other formats.
